Individual Mods

1. Mo Creatures (<http://mocreatures.org/>)
 - A mod which allows up to 40 new mob creatures from snakes to golems. These new animals are anatomically correct and great to add variety to different environments.
2. Instant Massive Structures (<http://www.planetminecraft.com/mod/11-instant-massive-structures-mod-v10/>)
 - Pre-built structures instantaneously appear. These are great to fill out large scale cities or to give you examples of structure and spacing for your own buildings.
3. Mr. Crayfish's Furniture Mod (<http://www.mrcrayfish.com/furniture.php>)
 - This is the best furniture mod! Not only is it stocked with furniture, Mr. Crayfish textured all of the pieces in the same style as Mojang so furniture looks like it was actually crafted in Minecraft at a craft table!
4. Pixelmon (<http://pixelmonmod.com/>)
 - Have you ever fallen in love with trying to capture wild Pokemon? Imagine if you could do that in Minecraft?! This mod adds new creatures based on Pokemon.
5. ComputerCraft (<http://www.computercraft.info/>)
 - Based on the original programming of 'turtle' robots from the 1970s, this mod helps teach you the basics of programming. Once mastered you will be able to build mansions in minutes and with only one click of the button! This is a great way for students to experience the basics of programming.
